FOR IMMEDIATE RELEASE

REGO Invests in Integrated Gas Technologies of Denmark

September 1, 2011—Elon, North Carolina USA

RegO Products has made a significant investment in Integrated Gas Technologies (IGT) of Denmark.

IGT is a leading manufacturer and marketer of LP-Gas control equipment, including small cylinder regulators and related accessories.

IGT founders Tom Lundquist and Peter Jacobsen will continue their respective management roles for IGT.

RegO's investment will allow IGT to aggressively grow the brand's reach and market share in both new and existing markets worldwide.

RegO, headquartered in Elon, North Carolina (USA), is the global leading manufacturer of regulators, valves and other control equipment used in the transportation and storage of liquefied gases.
